Projects

Project One -**Ethical Makeup** - LIVE | REPO
A group project making a makeup website based on a client brief. Using react, firebase and an API. This website is designed to show vegan products and the user can add their personal review.

Project Two - **The DOG APP** – LIVE | REPO
Using three APIs and jQuery library this app is designed to give you detailed information and images on each breed.
https://github.com/paria340/WoofSite

Project Three - **Book Genius** – LIVE | REPO
Using react, an API and firebase, the user can search for a book, find its plot, and a link to its e-book. The user can also see what others have been reading.
